## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11-15 and 23-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ungerstedt (US 4,694,832).

Claims 11 and 16 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Liska et al (US 6,264,627).

Claims 26-27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mishra et al (US 5,441,481).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Liska in view of Ungerstedt.

Claims 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liska in view of Eshel (US 5,257,977).

Liska teaches all the claimed subject matter except for the profile having a star or flat shape. Eshel teaches the common profile shapes of star and flat shapes. (See figures 4B and 5B respectively). It would have been obvious to one of ordinary skill in the art that the lumens of Liska could just as effectively been designed with a partition dividing up a larger lumen such as that taught by Eshel, as it was with lumens developed in a solid substrate. Both of these configurations are well-known and are interchangeable in the art of catheters.
